Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This office action is in response to applicant's communication of October 21, 2009. Claims 2-14 and 16-27 are pending and have been examined. The rejections are stated below.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/8/09 has been entered.

Response to Amendment

3. Claims 2-13, 16-17, and 23 were amended. Claims 1 and 15 were cancelled.

Response to Arguments

4. Applicant's arguments have been considered but are deemed moot in view of new ground(s) of rejection.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 2-13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to nonstatutory subject matter. The preamble of independent claim 13 recites a computer based system. The body recites "a matching program, graphical user interface, data staging program, and a post match handler. The Examiner interprets each of the aforementioned as software. As recited in claim 13, the software per se does not have any link to an apparatus such as a computer to realize its functionality.

Software per se represent data structure without being connected to an apparatus such as a computer does not fit into any of the four statutory classes (process, apparatus, article of manufacture and composition of matter) and therefore is not a statutory subject matter under 35 USC 101. Dependent claims 2-12 are also rejected under 35 U.S.C. 101 based on there dependence to claim 13. (MPEP 2106 Patent Subject Matter Eligibility [R-6])

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 2-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

9. Claims 13 recites "a matching program accessing remittance lines of said remittance, transaction information". There is lack of antecedent basis for the term transaction information. Dependent claims 2-12 are also rejected under 35 U.S.C. 112 second paragraph based on there dependence to claim 13.

10. Claim 13 recites "using the matching rule, a weight assigned to each of the parameters of the plurality of parameters. It is not clear what is meant by this phrase. For the purposes of examination, the Examiner will interpret the phrase to mean using the matching rule to assign a weight to each of the parameters of the plurality of parameters.
